

# Feynman's Epilogue

..... the main purpose of my teaching has not been to prepare you for some examination- it was not even to prepare you to serve industry or the military. I wanted most to give you some appreciation of the wonderful world and the physicist's way of looking at it, which, I believe, is a major part of the true culture of modern times. (There are probably professor of other subjects who would object, but I believe that they are completely wrong.)

Perhaps you will not only have some appreciation of this culture; it is even possible that you may want to join the great adventure that the human mind has ever begun.
